

Solution Overview

SUTHERLAND

EXTRACT

Have you ever wondered why the data extraction process is so template driven, costing you time and money?

And why the success rates plateau at early 70s, demanding human involvement and limiting a frictionless digitization process? And why they are limited to structured document types?

Organizations that have earlier used legacy data extraction tools highly recommend Sutherland Extract upon changing over. This solution is an AI driven data extraction platform which guarantees you the highest digitization outcome on day 1. Power packed with deep learning and neural network architecture, Sutherland Extract works and learns with human like intelligence. The powerful pre-processing renders lowest template dependency and the post processing mechanisms give customized data output. Sutherland Extract transforms your data extraction process.

When good enough data extraction is not good enough, consider Sutherland Extract.

Highest Digitization

Cutting Edge Intelligence

Trainability & Learnability

Automation & Integration

Shortest TTR

Betterment of TCO

No one wakes up telling 'Yay, I love data entry'. Extract delivers a fully automated data extraction powered by AI.

Sutherland Extract

Sutherland Extract is built keeping in mind the true automation needs of an organization. The platform guarantees the highest digitization outcomes, along with agility, accuracy, scalability, data customization and experiential learning, making it a human like automation worker.

Highest Digitization

Extract comes with pre-trained models that enable it to deliver unprecedented template free digitization. It also offers a continually improving rate of digitization on continuous exposure to your data sets. It delivers measurable improvement in time and quality of extraction.

Cutting Edge Intelligence

Powered by AI and ML, Sutherland Extract utilizes cognitive data extraction techniques. The core engine works on the deep learning technology and taps into Sutherland's pre-trained models and huge data sets. It thus delivers the most accurate level of digitization in the industry. Expect mid 70s on day 1 and high 90s between day 60 to 90.

Trainability & Learnability

Easily train Sutherland Extract with your document type on what you need to extract, the level of accuracy you need and the rules of validation. Human can be in the loop, training the engine and helping the engine get smarter over a period.

Automation & Integration

Sutherland Extract has been built to create a stress-free automation journey. It integrates gracefully with your upstream and downstream applications – be it ERP, BPM, or RPA. Pick our open API, or choose a custom-made integration, specific to your organization's workflow.

Shortest TTR

The Sutherland Extract platform is readymade. It is vertically trained. It has pre-processing and post processing engines that can improve input and customize output. It is enterprise grade and is experienced in processing millions of documents. The platform adds on to your existing system as an added wrapper, making it easy to adopt and start seeing results rapidly.

Betterment of TCO

We have constructed the Sutherland Extract pricing model to make it economically viable and make business sense. More importantly it helps achieve very quick Return of Capital Invested, on a pay per consumption mode. Gain superlative digitization on the lowest possible TCO.

Think beyond the traditional OCRs. Give your process the privilege of an intelligence backed data extraction platform. Challenge the status quo with Sutherland Extract.

Sutherland is an experience-led digital transformation company. Our mission is to deliver exceptionally designed and engineered experiences for our customers and employees. For over 35 years, we have cared for our clients' customers, delivering measurable results and accelerating growth. Our proprietary, AI-based products and platforms are built using robust IP and automation. We are a team of global professionals, operationally effective, culturally meshed, and committed to our clients and to one another. We call it One Sutherland.
