ADVANCE EFFICIENCIES WITH AN INTELLIGENT
RPA PLATFORM

Powered By AI, Sutherland Robility™ Delivers Measurable Business Outcomes

IS YOUR RPA SOLUTION DELIVERING RESULTS?

Businesses are realizing the importance of a robust automation strategy. But not all RPA products are created equal. Most businesses that have implemented RPA have seen limited measurable gains.

Whilst process automation makes technical sense, your solution has to make business sense too. Organizations today need an intelligent RPA solution that allows hyperautomation at scale and doesn't hurt bottom lines with high licensing costs.

Swiftly and precisely automate repetitive tasks to enhance efficiency and accuracy. Robility's™ ease of implementation, scalability, and compatibility enables rapid digital transformation.

GET SMART ABOUT YOUR AUTOMATION STRATEGY

Sutherland Robility™ is a comprehensive RPA platform. Intelligent, patented, and self-service, it's designed to deliver operational transformation and maximize outcomes. It's packed with advanced AI and machine learning capabilities, and is the only RPA product that offers licenses on tap – reducing your total cost of automation.

AN ANSWER TO THE HYPERAUTOMATION CHALLENGE

Robility™ is a hyperautomation solution that makes technical sense through enhancing process automability, and business sense by doing so without breaking the bank. Robility's™ AI-enhanced capabilities work to transform operations and maximize business outcomes, whilst leveraging existing skill sets.

Leverage AI and ML. Eliminate costly re-work and long development efforts by creating bots right the first time, every time.

Intelligent Automation. Our native AI capabilities help you better process unstructured data. Robility™ seamlessly integrates with any third-party AI technology, and our intelligent designer lets you create smarter bots at a third of the current average time for other solutions in the market.

Hyperautomation at Scale. Attended bots can help employees achieve simple automation and voluminous transaction processing, and unattended bots enable pre- and post-processing. Robility™ supports an array of deployment models, including on-premise, IaaS, PaaS, SaaS, and hybrid options.

End-to-End Business Process Automation. Use Robility™ to capture business and technical requirements effectively, develop rapidly, and better navigate automation implementation and post-deployment management.

24/7 Bot Monitoring. Robility's™ automation command centre delivers preventive maintenance by monitoring bots to ensure peak performance and governance.

Bottom Line Friendly. Sutherland Robility's™ license-on-tap model saves you millions of dollars in license costs by eliminating the need for run-time overstocking. Our hyperautomation capabilities create bots quicker, thereby reducing your DevOps costs.

Make sure you get automation right. Invest in an intelligent automation platform that not only delivers efficiencies, but controls costs and leverages existing skill sets.

Experience enterprise automation innovation with Sutherland Robility™.

We make digital human™

Sutherland is an experience-led digital transformation company.

Our mission is to deliver exceptionally designed and engineered experiences for customers and employees. For over 35 years, we have cared for our client's customers, delivering measurable results and accelerating growth. Our proprietary, AI-based products and platforms are built using robust IP and automation. We are a team of global professionals, operationally effective, culturally meshed, and committed to our clients and to one another.

We call it One Sutherland.
