

EXPERIENCE INTELLIGENT DATA EXTRACTION WITH **SUTHERLAND EXTRACT**

Fully Automated data extraction, Powered by AI

HAVE YOU EVER WONDERED WHY DATA EXTRACTION SUCCESS RATES STRUGGLE TO GO BEYOND 70%?

Traditional Data Extraction processes are a drain on time and money. Many organizations still rely on legacy technology that doesn't support unstructured data, demanding human intervention. Limited templates and document types hinder integration and digitization outcomes.

Your data extraction shouldn't just be 'good enough'. You need a solution that is truly intelligent, harnessing next-gen technologies to break through the limits of standard data extraction and providing reliable, actionable, and accessible data.

Sutherland Extract guarantees agility, accuracy, scalability, data customization, experiential learning, and the highest digitization outcomes.

THE FUTURE OF DATA EXTRACTION

Sutherland Extract is an AI-driven, industry pre-trained, document agnostic, self-learning ICR/OCR/Hologram processing platform. Packed with deep learning and a neural network architecture, Sutherland Extract works and learns with human-like intelligence, and has inbuilt business intelligence and insights. Powerful pre-processing renders the lowest template dependency, and post-processing mechanisms give you a customized data output.

SUTHERLAND EXTRACT

Don't lose out to legacy systems. Sutherland Extract is more than your everyday data extraction solution. Bringing measurable improvement in time and quality of extraction, Sutherland Extract delivers the most accurate level of digitization in the industry.

High Digitization. Pre-trained models deliver unprecedented template-free digitization and a continually improving rate of digitization.

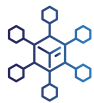

Cutting Edge Intelligence. Powered by AI, ML, and deep learning technology, you can utilize cognitive data extraction techniques and tap into our industry specific pre-trained models and huge data sets.

Training & Learnability. Easily train Sutherland Extract with your document type, the data you need to extract, the level of accuracy you need, and the rules of validation.

Automation & Integration. Use our open API, or choose a custom-made integration specific to your organization's workflow. Integrate easily with your upstream and downstream applications – be it ERP, BPM, or RPA.

Document Management & Archival System. Seamless document management searchability and archival.

Reduced TTR. Experienced in processing millions of documents, Sutherland Extract also has pre- and post-processing engines that improve input and customize output.

Improved TCO. Gain superlative digitization on the lowest possible TCO. Sutherland Extract helps achieve a quick ROCI on a pay-per-consumption model.

Think beyond traditional data extraction tools. Give your process the privilege of an intelligence-backed document processing platform.

Challenge the status quo with Sutherland Extract.

Sutherland is an experience-led digital transformation company.

Our mission is to deliver exceptionally designed and engineered experiences for customers and employees. For over 35 years, we have cared for our client's customers, delivering measurable results and accelerating growth. Our proprietary, AI-based products and platforms are built using robust IP and automation. We are a team of global professionals, operationally effective, culturally meshed, and committed to our clients and to one another.

We call it One Sutherland.
